Dear Ester,

It is time to STOP the poisoning of our food with RoundUp, whose active ingredient, glyphosate, is a carcinogen put also mimics amino acids and disrupts our ability to synthesize food properly.

There are SO many reasons to ban glyphosate: your health, your children and grandchildren's health...expand that to the health of everyone on this planet!

Please make it imperative that a warning sticker labeling food sprayed with glyphosate is a carcinogen. Let's make this happen now.
For the better health all of us.

Sincerely,

Roxanne E. Fleszar
